Publications:

• F. Mrugała, Mol. Phys. 65, 377–89 (1988), *Predissociation of the D 1Π u state of H₂ by photon impact*
• F. Mrugała, J. Chem. Phys. 93, 1257–72 (1990), *Application of the log-derivative method to variational calculations for inelastic and reactive scattering*
• F. Mrugała, P. Piecuch, V. Spirko, O. Bludsky, J. Molec. Structure 555, 43-60 (2000), *Lifetimes and dissociation pathways of the quasi-bound states of the Na····FH van der Waals molecule*
  Near-infrared absorption spectrum of the Ar-HD complex: A theoretical study of predissociation effects

  Accurate quantum calculations on three-body collisions in recombination and collision-induced dissociation. II. The smooth variable discretization enhanced renormalized Numerov propagator

  Radiative association of $\text{HeH}_2^+$

  Radiative association of $\text{He}^+$ with $\text{H}_2$ at temperatures below 100 K

  A computational study of metastable states of $\text{CO}^2+$.

  Radiative charge transfer in $\text{He}^+ + \text{H}_2$ collisions in the milli- to nano-electron-volt range. A theoretical study within state-to-state and optical potential approaches
